

# Certifications

**Earn Your National Certification!** APT US&C is proud to offer a wide array of educational and certification opportunities to treasury professionals.

The [Certified Public Finance Administrator \(CPFA\)](#) is an ongoing accreditation that members can earn to validate their experience and education on a national level. There is also an Advanced CPFA available to earn.

The [Certified Public Funds Investment Manager \(CPFIM\)](#) is a nationally recognized certification that also shows a high level of comprehension and understanding for finance professionals involved in investing funds. An Advanced CPFIM is also available; this training takes a deeper dive into the hows and whys of implementing a solid investment plan.

The final type of certification is for organizations, not individuals: by having your [policies reviewed and approved by APT US&C](#), you can show valued stakeholders that your organization is prepared and that you have policies in place that have received a national stamp of approval. Policies that are accepted for review include investment, cash handling, disaster preparedness, and debt.
